**Bitcoin, Ethereum and Ripple are three famous names we hear in the cryptocurrency market. Here's how to ensure investing in them is safe.**

By [Robert Cordray](#) for Born2Invest: You may have been hearing a lot in the news and on social media lately about cryptocurrencies. Bitcoin, the most prominent cryptocurrency and the one you're most likely to have read about, has been around since 2009. However, it's only been in the past few months that cryptocurrencies have exploded into the national and worldwide consciousness. You've probably seen the outlandishly dramatic [value increases](#) that cryptocurrencies have realized in 2017, and maybe heard stories of people who have become rich [investing in cryptocurrencies](#). But the question now is: Can someone invest in cryptocurrency today and view it as a safe, profitable investment? The answer is yes, with some caveats. Cryptocurrencies can be a safe investment vehicle, provided you follow certain principles and tips.
