**President Donald Trump has received strong support from some Israeli sources for his movement of the U.S. Embassy to Jerusalem. However, a headline in today's edition of *Haaretz* reads: 'America's Enemy: Trump's Ghostwriter Backs Claim Trump Has Been Russian Asset for Thirty Years'**

July 15, 2018 President Donald Trump believes he has gained tremendous leverage in Israel for his recent actions to move the U.S. Embassy to Israel to Jerusalem and his implacable opposition the U.S.-Iran nuclear agreement. However, *Haaretz*, one of Israel's most widely read newspapers in singing a substantially different song, carrying an article today that suggests that Trump could be engaged in what – if proven correct – might be considered treasonous activity. The *Haaretz* article says in part: Tony Schwartz, who ghost wrote Trump's 1987 bestseller, 'The Art of the Deal,' says that Trump has likely been an "asset" of the Russian government for at least 30 years.

Tony Schwartz @tonyschwartz tweeted:

Journalists need to start taking seriously the possibility that the Russians have owned Trump for many years & that he is their asset and America's enemy. Jonathan Chait's story is a must read which pulls together all the existing evidence. <https://nym.ag/2L3mnkF>
